For cleaning of apples after harvest in foam washers prior to application of Campbell Apple Waxes

DIRECTIONS FOR USE

APPLE WASH requires dilution with water at a rate of 1 litre of APPLE WASH to 17 litres of water. This dilution should be foamed and brushed on to the apples for 15-30 seconds after which thoroughly rinse with fresh water.

Ideally the foam should carry over the first four brush rollers.

For apples that are difficult to clean use less dilution water to make a more concentrated cleaner.

Safety Directions: May cause skin or eye irritation in concentrated form. In case of contact flush with water. If irritation persists see physician. Avoid prolonged contact of undiluted product with skin. Keep out of reach of children. Keep container closed when not in use
