

NO MORE LOOKING LIKE A SMURF

Blazon®

**PATENTED NON-STAINING
BLUE SPRAY INDICATOR**

NON-STAINING TECHNOLOGY OF **Blazon**

Blazon is the latest technology from Campbell Chemicals. Blazon is a non-staining spray indicator used to identify blocked nozzles and reduce costly overlapping. Blazon indicates areas that have been sprayed. Blazon does not stain your skin, clothes, equipment or any surface it touches. It easily washes off with a little soap or just water. This is because Blazon has patented technology that uses a 100% non ionic polymeric colourant. Blazon is pH neutral and completely soluble.

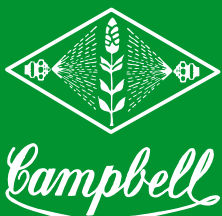

On turf Blazon dissapates with sun, water, dew and sunlight quicker than acid dyes commonly used.

Blazon can be used with any type of pesticide, fertiliser, growth regulator, termiticide applications or where precise uniform application is a must.

 Application Rates	
Application	Rate
Boom Sprayer	2mL-3mL per litre of spray solution <i>(200mL-300mL per 100L of spray solution)</i>
Backpack Sprayer	8mL per litre of spray solution <i>(80mL per 10L of spray solution)</i>
Termiticide pre-treatments	2mL-4mL per litre of solution
Rates can be varied to suit the operators colour preference.	

 **is available in:**

5L containers & 25L drums (tap included)
