# 250GT<sup>®</sup>

Turf Fungicide

250 GT works as a preventative and curative fungicide that affects all phases of the development of the fungi including the:

- Spore development,
- Mycelium growth
- The development and production of spore producing organs.

250GT is a locally systemic (translaminar systemic) fungicide that moves into the plant surface. Upon contact and 250 GT protects the plant at the point of contact and also moves through the leaf to protect both the upper and lower parts.

Note with 250GT make sure water pH is between 5-6 as a higher pH causes rapid hydrolysis.

<b>Product Name:</b>	<b>250GT<sup>®</sup></b>
<b>Product Type:</b>	<b>Fungicide</b>
<b>Active Constituent:</b>	<b>250g/L Iprodione (oil based)</b>
<b>Resistance group:</b>	<b>2</b>
<b>Formulation:</b>	<b>suspoemulsion</b>
<b>Pack Size:</b>	<b>10L</b>

Disease Controlled	Rate per 100m <sup>2</sup>
