Weeds Controlled by Passtox® Clear

SITUATION	PEST	STATE	RATE	COMMENTS
TURF COUCH Golf Greens, parks, Lawns and Tennis courts	Paspalum, Summer Grass, Mullumbimby couch Crabgrass Sedges Nut grass	All States except WA	250mL-660mL in 4.5L-20L water per 100m ²	Area to be watered the previous day to ensure the soil is moist. use the finest spray possible. Some injury may occur if applied if air temperatures exceed 30°C.
		WA only	250mL in 4.5L-20L water per 100m ²	
Bowling Greens		All states except WA	10L in 300L of water per standard size green	Use of lower rates will reduce discolouration but will require repeat applications 7 days and 14 days later. Repeat spray program as necessary
		WA only	3.8L in 300L of water per standard green	
TURF BENT OR FESCUE Golf Greens, parks, Lawns and Tennis courts		All States	250mL-410mL in 4.5L-20L water per 100m ²	
Bowling Greens		All States	6.1L in 300L of water per standard green	
TURF BUFFALO GRASS Golf Greens, parks, Lawns and Tennis courts	WA only	250mL in 4.5L-20L water per 100m ²		

Handy Hints When Using Passtox® Clear

- Allow a minimum 24 hours before irrigation or likelihood of any rain to ensure that the spray will be absorbed into the weed.
- Avoid spraying in very hot conditions (above 30°C), as inadequate absorption by weeds will occur. Also this product may be ineffective below 21°C
- Using a suitable wetting agent (sticker) on harder to kill weeds can increase effectiveness.
- The timing of sprays can be crucial. Weeds are always best sprayed when they are young; at this stage they are most susceptible to herbicides. As weeds age they are increasingly difficult to control, as well as possibly leaving unsightly marks in fine lawns.

DO NOT use on Kikuyu, Queensland Blue Couch, Carpet or Centipede grass as injury will occur.

PASSTOX IS AVAILABLE IN 10L AND 5L CONTAINERS
